

Professional Development **Associated General Contractors of America, Inc.** **Houston Chapter**

Course: Introduction to Environmental Compliance and Management
Date: January 26th – 29th 2008
8 am – 5 pm
Location: AGC Houston, 3825 Dacoma St., Houston 77092
Cost: \$695 for AGC Houston Members
Audience: All Construction Industry Supervisors, Safety Professionals and Storm Water Pollution Prevention Managers

Content:

This course is designed to give professional the tools they need to ensure their workplace is in compliance with environmental regulations, reduce environmental risk, and anticipate pending environmental issues. It will cover the basics of environmental regulations, and show the professional how to identify pertinent regulations. The course will also cover how to manage common tasks associated with an environmental department such as permitting, avoiding violations, preparing for an inspection, keeping records and preparing reports. The course will follow a case study through each media to allow attendees to apply knowledge of topics discussed during the course.

Topics Covered:

Environmental Management Systems, Air Quality, Water Quality, Waste Regulations, Multi-Media and Other Environmental Issues
